Jack, My truth campaign is carried aloft by the encouragement and compassion of people like you! I wish I could commandeer one of the US government's teleporters this instant and take the two of us right into a meeting with Tesla. Alas, the infrastructure of the 21st century that he invented remains classified and it is for us, the living, to liberate it on behalf of humanity. I am saving a seat for you at Grand Central Teleport in New York City! Andy

Jack, If I am a giant, then so are you! I think that President John F. Kennedy was right. The lesson of history teaches us that human beings can be as big as they want to be. The key thing is to take hold of mighty purposes while never losing sight of the fact that one is dwarfed by the Great Spirit who created everything! Andy
